

# Trout Fishing in America

## WORKSHOP TECHNICAL REQUIREMENTS

Trout Fishing in America Workshops are very participatory events. On flying dates, in order for their instruments to be heard during the workshop some minimal technical equipment is required as follows:

**1 small guitar amplifier (One 12" speaker) (Crate, Peavey, etc)**

**1 small bass amplifier (One 15" speaker) (Crate, Peavey, Hartke, Ampeg, etc.)**

**We also need:**

**1 white board w/erasable markers, chalkboard or flipchart (at least 18"x 24")**

If the size of the class is over 50, a small PA may be required so that all students can hear. In this case, no bass or guitar amplifiers are needed.

### **Direct all technical questions to:**
